

TERM-seal™
MULTI-PURPOSE ACTIVE
Termite & Waterproof Barrier

Active termite and waterproofing barrier for use in building situations

TERM-seal™ Multi-Purpose Active is a highly engineered, acrylic polymer-based liquid which upon curing forms a seamless, flexible, termite resistant and waterproof membrane. Applied by brush, roller or heavy-duty airless spray gun, applications include wall backfills, internal walls, internal wet areas, construction joints, step downs & cavities.

- Used in conjunction with TERM-seal™ Reo-Band FG to form a perimeter and damp-course barrier to cyclone rated knock-out infill construction
- Dual water-proof/termite single application Tested by CSIRO as an approved waterproofing compound and complies to Building Code of Australia Volume 2, AS3660.1-2014., AS/NZS 4347.6 and AS/NZS 4858-2004. And applied as waterproofing to back-filled walls to meet the requirements of A.S. 3740
- Used as a simple, easy to apply slab edge exposure perimeter treatment, or to waterproof slab edges.
- Applied to cavities to form a termite proof perimeter barrier.
- Used to treat construction joints across concrete slabs
