

TERM-seal™  
**URA-FEN SHIELD TWB**  
Termite & Waterproofing Barrier  
**A JOINT FILLER STRIP**

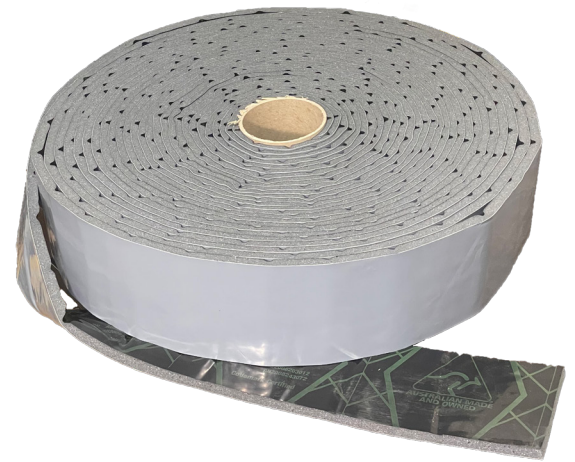

The ultimate termite barrier and waterproofing for construction and expansion joints.

TERM-Seal™ Ura-Fen Shield Termite and Waterproofing Barrier 100mm with Bifenthrin is widely used as an alternative to the traditional expansion joint or space filler strip materials that are required to isolate dissimilar construction materials such as concrete slabs to tilt up panels. It comes in a 100mm wide strip to use in construction joints to prevent concealed entry, it offers the same reliability you expect from TERM-Seal™ Ura-Fen Shield TWB and helps the builder save time and money on his projects.

- A tri-layer chemical sheet which kills and repels termites
- Lasts the lifetime of the building
- Complies to Australian Standard 3660.1
- No delaminating or nasty residue reactions
- CodeMark Certified
- APVMA Registered
- 100% Australian Made, Australian Owned Company
- Easy to install, saves time and money on projects

**NO COSTLY RETREATMENTS**

TERM-seal™ Ura-Fen Shield Termite and Waterproofing Barrier 100mm can be used for both pre-construction and post-construction

**PRODUCT OVERVIEW**

Available in a convenient 25m roll, 100mm wide strip
